

FI Consultancy

The FI key on the keyboard is there for help.

FI Consultancy can help you to achieve your technical goals whatever they may be.

TOP 10 REASONS TO USE ONLINE DATA BACKUP

Easy to use

By utilizing the simple “set and forget” features on the software mean you simply choose what you want backed up and up and when. On demand or on a set schedule your data is automatically sent to our two data centers

Cost

Online data backup is very cost effective. There are no initial costs for hardware or setup and the price reduces the more your data grows.

Support

Management of the data backup process, changing times or data selection can be done easily by the user. We monitor the infrastructure meaning that no maintenance is required

Compliance

As part of a business continuity plan the online backup service can help to achieve compliance with regulatory requirements and data protection regulations

Time management

The automated schedule frees up your time and therefore boosts productivity, data is backed up incrementally. This means that backup windows are considerably reduced

Secure

Two copies of your data are protected by a military level encryption key known only to you. Stored offsite in our two, state of the art, data centers.

Data Recovery

From anywhere with an internet connection you can retrieve single files or a full restore reducing down- time in the event of a disaster.

Scalability

As your business data grows we can quickly and easily increase the limit on your account, without having to purchase additional hardware,

Suitable for all

Our disk to disk solutions provide fully encrypted backup, storage and recovery, ensuring the highest levels of data protection for SOHOs, SMEs and enterprises.

Mobility

Backup software is perfect for backing up on the move anywhere, anytime with an internet connection, eliminating the need to go back into the office.

**“One Third of user data in the cloud
by 2016”**
